FAF Development is an international project management and business development company, originating in the United States in 1982. FAF has operated in Afghanistan since 2004 and has assembled a team of expatriates and Afghan nationals capable of successfully implementing projects in the most challenging rural environments.

FAF operates with a "low profile" approach, which has enabled us to move and work in some of the most inaccessible regions in southern Afghanistan. We take pride in our "can do" approach, our results-driven work ethic, and our ability to make things happen on the ground. We are farmers shaped by practical experience, enabling us to provide a unique service to our clients.
